

**The first "ZMP Company Intro Session" for New Grads**

# Get to know ZMPeople

## ~ Want to know more about Autonomous Driving? ~

At ZMP, we are developing products and services that make use of AI, Autonomous Driving and robot technology.

Japan is one of the country in the world with the lowest birthrate and aging population, and it is already becoming serious as social problems such as staff shortages at logistics sites, shops, and many areas. Autonomous Driving technology holds the potential to solve these social problems.

We are finding a solution to this through our mission: "Robot of Everything: to create and empower new lifestyles by enabling free movement of people and goods".

Auto Taxi®

Delivery Robot CarriRo® Deli

## "Get to know ZMPeople" Company Intro Session

This Company Intro Session gives a chance for students and young professionals to have a glimpse at what it's like to work in the field of autonomous driving and you will have a chance to meet our highly talented engineers who are behind the innovation.

The actual robots will be showcased and can have an actual experience with our products namely "Auto Taxi®", "Logistics Support Robot CarriRo®", "Delivery Robot CarriRo® Deli".

We would like to create a new market through the development of services and businesses that utilize Autonomous Driving technology! Of course, you don't need to have experience in this field. We just ask that you bring your passion and curiosity.
